

INFANT/TODDLER SCREENING

Children between 4 months and thirty four months old are screened through the use of a questionnaire. Parents should call OCEC (815) 234-2722 to request this form. Spanish speaking parents should call the OCEC for the name and phone number of someone who will get the information necessary to send a Spanish version of the questionnaire to them.

After the parent has completed the questionnaire, it should be mailed back to the coop to be scored. The results, which show whether or not the child is meeting developmental milestones in the same time frame as other children of the same age, are mailed to parents. If a problem is found, the name and phone number of an agency the parent can contact for assistance is provided.
